TO INCREASE ELECTRIC POWER SUPPLY;
REPORT GASOLINE PLANT REBUILT IN USSR

PIAU BOILER HOUSES, POWER LINE -- Taegliche Rundschau, No 82, 6 Apr 50

To increase electric power production, two modern boiler houses with a combined capacity of 38,000 kilowatts will be added to the electric power plant which supplies the western sector of Halle. Remodeling of the plant has resulted in production increases of another 18,000 kilowatts.

Construction of a 30,000-volt electric power line from Gross-Kayna to Langendorf will increase the power supply of the Zeitz-Weissenfels area.

RUEGEN GETS 50,000-VOLT POWER LINE -- Nacht-Express, No 82, 6 Apr 50

A new 50,000-volt power line has been placed in operation to connect the island of Ruegen with the recently completed transmitter of the Northern Electric Power District in Stralsund. As a result, the island will be supplied with about ten times as much electric power as heretofore.

LEUNA WERKE REBUILT IN SOUTHERN USSR -- Neue Zuercher Zeitung, No 941, 5 May 50

In 1946 and 1947 the greater part of the Leuna-Werke (Merseburg), the largest and most modern producer of synthetic gasoline in Germany, was dismantled and shipped to the USSR. According to returned German prisoners of war, the plant has been rebuilt in southern USSR, near the Dnestr River, between Tiraspol and Nikolayevsk. The reports also state that German engineers were forcibly moved to the new location.
